

Propane Safety Checks are an integral part of our safety commitment. These personalized system inspections are performed by specially trained professionals and allow us to help keep you safe.

When is a Propane Safety Check required?

- On all new tank installations
- At any time the system is out of gas
- When there is a change in occupancy
- Report of or suspected leak (as reported by customer, employee or unexplained usage increase)
- Prior to initial propane delivery
- After any propane system modifications prior to returning system to propane service
- Any disruption of service

What does a Propane Safety Check entail?

During this comprehensive service, we review:

- The integrity of your tank and system
- The line going into your house
- The regulator which controls the flow of gas and lower the pressure from the tank to the appliance(s) in the gas system

How long does a Propane Safety Check take?

The service requires a scheduled appointment, at your convenience, and takes from 45-60 minutes in/around your home.

How often do I need a Propane Safety Check?

Most customers only require a check every five years unless dictated by the above criteria.
